# SECURING

## THE CHALLENGE

Dated and counter-productive solutions. As an operator, one of your main concerns is the security of your facility. Making an effective, secure way to control who can access your facility and when more than a nice-to-have, it's a must-have. It's also important to recognize that current Access Control products are dated, cumbersome and disruptive to operations. Whether it's the hassle of having to access a computer on-site or trouble-shoot the system in-person, it all adds up to headaches, lost-time and degraded operational efficiency.

## THE SOLUTION

A modern, efficient option. Out-of-date solutions don't cut it in an era driven by technology and automation. Not when your facility's security and bottom line are in question. As an operator, you know your time is more valuable when focused on day-to-day operations, improving tenant experiences and maximizing your revenue. To achieve the success and operational efficiencies you desire, you need a centralized Access Control solution that seamlessly integrates with your management software and existing workflows. Above all, you need a solution that empowers you to control it remotely.

## THE STORABLE APPROACH

We believe operators should be empowered to configure and manage their Access Control solution the same way they're already running the rest of their business—within their facility management software.

### ENHANCED OPERATIONAL EFFICIENCY

by managing, configuring, and troubleshooting your Access Control program anywhere, anytime from your facility management software.

### SIGNIFICANT TIME SAVINGS

through a single support team with expert knowledge to help troubleshoot any issues across the Storable Platform.

### OPTIMAL TENANT EXPERIENCE

by automatically granting tenants access to specific facility areas and guiding delinquent tenants to make payments when access is denied.

WITH  
STORABLE SOFTWARE

## Access Control for Operators, Designed by Operators

Our Access Control build has been a collaboration between us and many of our clients. Moving forward, we'd love for your voice to be heard. By using our Access Control solution, you'll be included in conversations about what we're thinking about building next to ensure that it's addressing your most critical business challenges. In the coming months, we will be addressing these key business challenges:

### EMBEDDED DIRECTLY INTO YOUR SOFTWARE

**Web-Based Software** — Seamlessly configure and manage your Access Control program directly within your SiteLink Software from anywhere at any time.

**Remote Access Point Management** — Storable's cloud-based Access Control software enables operators to remotely respond to Access Control issues by opening or closing your access points without having to be on-site.

**Assign Tenant Access Hours** — Assign access rules—such as hours throughout the day or days throughout the week—to each of the access points across your facility.

### SEAMLESS DAILY WORKFLOWS

**Move-In Workflows** — Simplify your daily workflows by granting tenant access privileges using Access Control tools embedded directly into the SiteLink tenant move-in flow.

**Move-Out Workflows** — Ensure your facility remains safe by automatically removing tenant access privileges during the SiteLink tenant move-out flow.

**Automated Lockouts** — Revoke tenant access privileges to your facility if they become delinquent and automatically reinstate them upon making a payment.

### ONE STORABLE, ONE SUPPORT

**Industry Expertise** — Get the help you need faster with a support team that has a deep understanding of storage operators and tenants' unique needs earned from years of exclusively serving the storage industry.

**Software & Access Control Expertise** — Unlock new value between your software, Access Control solution, and the broader Storable Platform with a support team that's knowledgeable across our entire suite of products.

COMING SOON

### INFORMING BUSINESS DECISIONS USING ACCESS CONTROL DATA

**Access Activity Logs** — Identify when and how tenants are using each of your access points across your facility to inform key business decisions.

**Tenant Record Logs** — Utilize access data stored directly on the tenant record to diagnose keycode issues or inform price increase strategies.

**Exporting Access Logs** — Amplify your ability to make informed decisions about your business by exporting your Access Control logs and combining them with other sources of data outside of SiteLink.

### SIMPLIFYING YOUR DAILY WORKFLOWS USING AUTOMATION

**Tenant Groups** — Identify when and how tenants are using each of your access points across your facility to inform key business decisions.
