THE CHALLENGE

For storage operators, payments have traditionally been a cost of doing business; a necessary evil. Balancing multiple tools to manage transactions, record-keeping, and security requires lots of time and attention. Time and attention that could otherwise be spent working with tenants, maintaining facilities, driving leads, or a number of other valuable activities. Operators across the industry want the same thing: a faster, simpler, and more secure way to manage payments.

THE SOLUTION

Storage operators need a payment solution that fuels their business rather than bogging it down. They need a solution that eliminates the complexity and busy work of manually tracking receipts, managing security, and bouncing from tool to tool. Storage operators need a better way to manage payments across every channel that matters to their tenants. Storage operators need a payment solution that just works.

THE STORABLE APPROACH

To help operators achieve this goal, Storable built its payments products with the end in mind. Storable Payments acts as an extension of Storable's facility management software—both SiteLink and storEDGE—to deliver an unmatched operator and tenant experience that just works.

IMPROVED SPEED

through automatic transaction reconciliation and eSignature capabilities.

ENHANCED SECURITY

with AVS, CVV, and PCI Level 1 Certification all underpinned by thorough annual penetration testing.

INCREASED SIMPLICITY

with comprehensive multichannel payment capabilities and a single, centralized administration portal for all your facilities.

ONE STORABLE, ONE SUPPORT

Storable Payments Capability Overview

At Storable, we believe payments should be fast, simple, and secure to provide a better experience for tenants and operators. Storable's integrated-platform approach can help you get more out of payments.

eSignature — Save time and money by leveraging the Storable Payment eSignature feature which captures and automatically stores the tenant signature alongside transaction information.

Automatic Reconciliation — Eliminate the need to conduct manual transaction audits with an automated bank account and transaction reconciliation feature that ensures your payments and accounting always tie out.

AVS & CVV — Limit potential fraud with Address Verification Services (AVS) and Card Verification Value (CVV) capabilities that add additional customer verification steps to authenticate customers on any payment channel.

PCI Level 1 Certification & Penetration Testing — Rely on Storable Payments' top-tier PCI certification and thorough, annual penetration testing to ensure that your tenants' card and personal data are protected.

Multi-Channel Transactions — Simplify the tenant experience by offering payments options across channels — including in-store, kiosk, over the phone, online, and auto-billing — with Storable Payments' fully integrated approach.

Centralized Login — Streamline transaction management, reporting, and settlement activity across facilities with a single centralized portal that will empower your team to get more done across your portfolio.

Industry Expertise — Get where you need to go faster with a support team that has a deep understanding of the unique needs of storage operators and tenants, earned from years serving the storage industry exclusively.

Software & Payments Expertise* — Unlock new value between your software, payments solution, and the broader Storable Platform with a support team that is knowledgeable across Storable's entire suite of products.
